Finish more jobs per season

You can get more work done with less people on the job. Cut time spent lifting and carrying so you can get jobs done faster. Your work crew can place trusses, lift components for upper-level remodeling jobs, or place and distribute roofing materials in a fraction of the time required to complete these jobs manually. Customers will appreciate shorter project times, and your work crew will be able to finish more jobs per season.

Lift and place large loads quickly

A Tall Hand Lifting System will minimize awkward, heavy lifting for work crews at jobs where a larger crane is impractical. Rely on Tall Hand's trailer-mounted, battery-operated, cable-controlled crane to lift and place large loads quickly, accurately, and safely. Your business can avoid accidents and reduce the risk of injury caused by manual lifting. Get the most out of your workforce and complete jobs sooner with the help of a Tall Hand Lifting System.

Keep Your Crew Safe

You can keep your crew safe and reduce time lost due to injuries with a Tall Hand Lifting System. Your work crew will be less likely to strain muscles or sustain falling injuries because they won't have to wrestle heavy loads up ladders or stairs. Eliminate the risk and backbreaking effort required to manually stand up walls. A Tall Hand Lifting System lifts and places:

- walls
- shower stalls
- shingles
- masonry
- bathtubs
- drywall sheets
- plywood
- trusses

Save time and energy

Save time and energy with a versatile Tall Hand Lifting System. Keep your crew adding value to raw materials, rather than wasting time and their energy lifting them. The system is mounted on a trailer for quick transport to and from job sites. Its compact size enables your crew to use the Tall Hand in tight spaces and at remote locations. Tall Hand lifting systems are quiet so you can operate in a residential neighborhood with virtually no noise. And they are environmentally friendly, have no emissions, no fuel, and no hydraulic leaks. Avoid scheduling problems when renting a crane from a rental service or other contractor by investing in a Tall Hand Lifting System.

Call us for more information

Call Tall Hand Lifting Systems to discover how you can raise your business to a higher level. You can request a product demonstration and discuss Tall Hand specifications and practical applications with experienced builders. Extend your project possibilities and elevate your business by calling Tall Hand Lifting Systems today.
